

1.4.A.3 Sex Offender Management Program

I Policy Index:

Date Signed: 01/24/2013
Distribution: Public
Replaces Policy: N/A
Supersedes Policy Dated: 03/05/2012
Affected Units: Adult Units
Effective Date: 01/28/2013
Scheduled Revision Date: November 2013
Revision Number: 5
Office of Primary Responsibility: DOC Administration

II Policy:

The Department of Corrections (DOC) will offer sex offender programming and services in an effort to provide effective supervision, opportunities for rehabilitation and reduce recidivism.

III Definitions:

Offender:

For the purposes of this policy, an adult offender is an inmate (in the custody of the DOC institutional system) or a parolee (under parole or suspended sentence supervision with South Dakota Parole Services).

Sex Offender:

For the purposes of this policy, a sex offender is any adult offender convicted or adjudicated of a sex crime as listed in SDCL [22-24B-1](#) regardless of the offense date or date of conviction, an offender serving a current prison term as a condition of a suspended imposition of sentence for the commission of a sex crime and an unconvicted sex offender.

Unconvicted Sex Offender:

An unconvicted sex offender is any adult offender sentenced to the DOC who has never been convicted/adjudicated of a sex offense by any court but has a history of sexually abusive or violent behavior (including sexually abusive or violent behavior while incarcerated) or the factual basis of a crime for which they were charged or convicted/adjudicated which involves sexual violence or abuse.

Sex Offender Management Program (SOMP):

SOMP is the sex offender management program operated by the DOC. This includes sex offender specific assessments, A&O psychosexual screens, STOP programming, psychosexual reports, community release planning, assistance in community supervision, development and promotion of a community treatment provider network, and sex offender community treatment and supervision standards.

Sex Offender Management Program Team:

The SOMP is delivered by the SOMP team, which consist of the program manager, clinical director, SOMP counselors, unit staff, transitional case managers, parole agents, and community treatment providers.

Special Treatment of Perpetrators (STOP):

STOP is the DOC sex offender program which is operated at the following facilities: South Dakota State Penitentiary, Mike Durfee State Prison, Jameson Annex and South Dakota Women's Prison. The goal of STOP programming is to provide the offender with the attitudes and behaviors necessary to return to the community and prevent further sex offending behaviors.

SOMP A&O Psychosexual Screen and/or Psychosexual Reports:

SOMP A&O psychosexual screen and/or psychosexual reports may include information from the following: pre-sentence investigation, psychosexual reports, Minnesota Sex Offender Screening Tool – Revised (MnSOST-R), Static 99, ABLE screening, monitor polygraphs, STOP file information and clinical interviews.

LSI-R:

Level of Service Inventory-Revised. An assessment used to measure an inmate's risk to reoffend and define the inmate's programming needs.

P-Scan:

An assessment to rate the inmate's tendency toward psychopathic behaviors.

IV Procedure(s):**1. Admissions:**

- A. Offenders are screened during Admission and Orientation (A&O) to identify convicted and unconvicted sex offenders (See DOC policy 1.4.A.2 [Inmate Admission](#)).
- B. Offenders convicted or adjudicated of a current or prior felony and/or misdemeanor sex offense(s) will receive a sexual behavior code of 2 and will be initially screened by the SOMP staff to determine if the offender meets programming criteria.
 1. A SOMP file will be started on all sex offenders entering A&O. The file will include information on the following as needed and available: LSI-R, pre sentence investigation, Psychosexual assessment, MnSOST-R, RRASOR/ STATIC 99, ABEL screen, clinical interview, polygraph reports, PSCAN, mental health assessment, and NCIC.
 2. The RRASOR/STATIC99 and MnSOST-R will be scored in the COMS Offender Assessment Questionnaire and a hard copy will be kept in the SOMP file.
 3. The ABEL screen will be administered in A&O to offenders who are within two (2) years of programmed release when it has not been included in the pre-sentence psychosexual or otherwise isn't available.
 4. The SOMP staff will review file material and prepare a [SOMP Program Track Screen Report](#) for each sex offender (See [Attachment 1](#)).
 - a. The report will summarize the offender's offense, criminal history, risk level, level of responsibility, treatment recommendations and determine if the offender meets STOP program criteria.
 - b. Offenders meeting programming criteria will be coded 2YWT. Offenders who do not meet criteria will be coded 2N.

- C. Offenders with a sexual behavior code of 2 who meet one (1) or more of the following conditions will be coded 2N, unless additional risk is documented in the [SOMP Program Track Screen Report](#) (See [Attachment 1](#)).
1. A current or prior single misdemeanor sex offense conviction.
 2. A prior single felony sex conviction or adjudication where the offender has had 6 consecutive years or a sum total of 6 years in the community with no further sex related convictions, revocations for sex related activities, or for failing to comply with sex offender programming.
 3. Completion of a sex offender treatment program and who have no subsequent sex offense-related misdemeanor or felony convictions.
- D. Offenders with an Immigration and Customs Enforcement (ICE) hold or Immigration and/or Naturalization Service (INS) hold or those serving a life sentence or capital punishment sentence will not be scheduled for the STOP programming and will receive a sexual behavior code of 2YNA.
- E. Offenders unconvicted of a sex offense who have plea-bargained from a sex offense to a non-sex offense or whose history includes information that supports the existence of sexually assaultive and/or abusive behavior will be scheduled for an unconvicted sex offender review hearing (DOC policy 1.4.B.9 [Unconvicted Sex Offender Review](#)).
1. Unconvicted Sex Offender Hearings will usually be held prior to an offenders release from the A&O the unit.
 2. When a factual basis of sexually assaultive and/or abusive behavior is established, the offender will receive a sexual behavior code of 2 and will be initially screened by the SOMP Management Team to determine if STOP programming is recommended.
 3. Unconvicted sex offenders will be screened for programming using the same criteria as convicted sex offenders.
 4. A SOMP file will be started on all unconvicted sex offenders. The file will include information on the following as needed and available: LSI-R, pre sentence investigation, Psychosexual assessment, MnSOST-R, RRASOR/ STATIC 99, ABEL screen, clinical interview, polygraph reports, PSCAN, mental health assessment, and NCIC

2. Institutional Programming:

- A. The SOMP Team will assess sex offenders during placement at A&O to determine risk level and programming needs.
1. **Low Risk Offenders:** SOMP staff will review the offenders file material and complete sex offender specific assessments to determine if the offender meets low risk criteria. The criteria is as follows:
RRASOR/STATIC99 score = low to moderate low
MnSOST-R = Level 1
Modified history polygraph = no deception indicated regarding victim(s) under the age of 13 years and/or sexual force.
 - a. Offenders who exhibit any of the following risk factors **will not** be classified as low-risk:
 - 1) Use of sexual force
 - 2) Multiple victims

- 3) Victims under the age of 13 years, including child pornography
 - 4) Exhibitionism with sexual gratification
 - 5) Incest offenders
 - 6) Sexual contact with someone incapable of consent
 - b. Offenders who meet the low risk criteria will be classified as 2YCP and will not be required to attend STOP programming or community based sex offender treatment.
 - c. These offenders will be polygraphed every six (6) months to monitor their low risk status. Offenders who fail a polygraph may be required to attend community based sex offender treatment.
2. **Moderate or High Risk Offenders:** Staff will review file material and complete sex offender specific assessments to determine if the offender meets the moderate to high-risk criteria.
- a. The criteria for moderate or high risk is as follows:
 1. A RRASOR/STATIC 99 score greater than moderate low and/or a MnSOST-R level greater than 1 or;
 2. The offender has ABEL results indicating a sexual preference for children under the age of 13 years and/or tendencies towards sexual violence or;
 3. The offender met the low risk criteria, but had deceptive polygraph results indicating victim(s) under the age of 13 years and/or sexual force.
 - b. These offenders are identified as having a moderate or high risk of violating parole for sexual behaviors or committing a new felony sex offense.
3. **Alternate Program Supervision (Unable to Benefit from Group Programming):** Research and clinical experience has consistently shown that highly anti-social/psychopathic offenders do not benefit from traditional group treatment. In fact, some research has shown that these types of offenders often use the skills learned in treatment to become better manipulators of others. In some cases, treatment may not be recommended.
- a. SOMP staff will review the pre-sentence report, psychosexual evaluation, mental health assessment, LSI-R and other file material to assess if the offender meets the criteria for not benefiting from group treatment.
 - b. Criteria include offenders with untreated psychiatric conditions, cognitive issues or who demonstrate highly anti-social or psychopathic characteristics.
 - c. An offender with a LSI-R score of High Risk/Needs (Females =>40 Males =>37) will have a P-Scan completed after 90 days of observation by unit staff assigned to the inmate.
 - d. Male offenders with an LSI-R score =>37 and female offenders with a LSI-R score =>40 and/or offenders with a P-Scan score greater than 30 may be identified as being unable to benefit from group programming.
 - e. An offender assessed as being someone who will not benefit from group programming will not be required to attend STOP while incarcerated. Community supervision strategies will be outlined in the SOMP psychosexual report.
 - f. All offenders assessed as being someone who will not benefit from group programming by

the SOMP may also be considered for notification to the Warden for review of withholding parole eligibility (DOC policy 1.4.B.11 [Withholding of Parole Eligibility Pursuant to SDCL 24-15A-32.1](#)).

- B. Offenders with a sexual behavior code of 2YWT will have a pre-release psychosexual evaluation completed approximately one (1) year prior to the inmate's programmed or initial discretionary release date. If necessary, the sexual behavior code will be updated to reflect any change.
- C. [STOP Contract](#) (See [Attachment 2](#))
 - 1. Offenders assessed as needing STOP programming are required to sign the STOP contract prior to a transfer from an admissions unit and prior to beginning the STOP programming.
 - 2. Offenders may be removed from programming for violating the conditions of the STOP contract.
 - 3. Offenders who refuse to sign their contract are in non-compliance with that element of their IPD (See DOC policy 1.4.B.1 [Individual Program Directives \(IPD\)](#)).
 - 4. Offenders who refuse STOP programming will be asked to sign a [Program Refusal Form](#) (See [Attachment 3](#)). If the offender refuses to sign the form, SOMP staff will sign and date the form noting the offender's refusal to sign.
 - 5. Offenders requesting to return to STOP programming after refusing program must do so in writing. The SOMP Team will review the request and respond in writing.
- D. [STOP Modules](#) (See [Attachment 4](#)):
 - 1. STOP program groups are designed to prepare sex offenders for entry into a community based sex offender treatment group.
 - 2. Offenders attend STOP programming approximately two (2) hours per week for 9-12 months prior to releasing to community supervision.
- E. Psychosexual reports will be completed in the following ways:
 - 1. A psychosexual report may be completed as part of the pre-sentence investigation and be on file with the DOC.
 - 2. A pre-release psychosexual report will be completed prior to an offender's release to the community. Offenders who have refused STOP programming will be required to complete a psychosexual evaluation while under community supervision.
 - 3. A contracted community provider may complete a psychosexual report once the offender has been released to the community.
- F. Transitional Release Planning
 - 1. The SOMP staff will assist the offender with release planning during STOP programming and will identify the appropriate community treatment provider.
 - a. The SOMP psychosexual report will include treatment recommendations.
 - b. The SOMP Staff will make recommendations for community treatment on the offender's release plan. These recommendations may include, but are not limited to, one or more of

the following: increased polygraph schedule, individualized supervision plan, type of programming, and frequency of programming.

- c. Once approved, the SOMP staff will make a referral to the community treatment provider.
2. Offenders releasing to parole supervision requiring community treatment must be accepted by a community treatment provider before being released to supervision and must make contact with the community provider within five (5) working days of release into the community.
3. Offenders assessed as needing STOP programming and who refused are allowed five (5) working days in the community to contact a community treatment provider and thirty (30) days to be accepted into a community treatment program. This includes suspended sentence releases.
4. Offender assessed as being someone who will not benefit from group programming will be assigned to an individualized supervision plan that will include intense supervision emphasizing accountability meetings with the parole agent and a treatment provider and/or SOMP staff.

3. Community Sex Offender Treatment and Supervision:

- A. The following information will be considered when determining community sex offender treatment and supervision for sex offenders:

1. Sex offender group and/or individual sessions
2. Sex offender registration
3. Community safety zones and regulations
4. Polygraphs
5. GPS monitoring
6. Sex offender and mental health reports and assessments
7. Law enforcement and victim notification

- B. Community Treatment Providers:

1. The DOC contracts with community treatment providers to provide community treatment services for sex offenders.
2. Community treatment providers offer sex offender specific services under these DOC contracts to sex offenders according to [SOMP Treatment Providers Standards](#) (See [Attachment 5](#)).
 - a. The standards outline DOC requirements for licensure, professional organization membership, treatment contracts, offender records, DOC access and supervision.
3. Any offender interfering with the transfer of records, or removing any confidentially agreement with a treatment provider and/or polygraph examiner will be considered to be refusing community treatment services.

4. Polygraph Testing and Management:

- A. The following polygraphs are recognized by SOMP.
 - 1. Sexual History/Full Disclosure – is review and verification of an offender's sexual history and behaviors up to the present conviction. The history polygraph helps the treatment provider set treatment goals, identify sexual preferences and risk factors.
 - 2. Monitor – is a polygraph examination that reviews an offender's sexual behavior or sexual deviancy. This polygraph can be used by the SOMP staff to help assess an offender's treatment risk level or by a parole agent to verify an offender's behavior while on supervision.
 - 3. Specific Issue – is a polygraph examination that addresses a singular event or behavior. This polygraph can be used to follow-up on a failed polygraph or to verify a reported act or behavior of the offender.
- B. Polygraph examinations on community supervision allow parole agents and providers an opportunity to establish risk management and treatment objectives.
 - 1. Deceptive results indicate areas of concern that the provider and the parole agent need to investigate.
 - 2. Polygraph data should be used in conjunction with other information when making decisions about case management.
 - 3. The polygraph results may be used to establish an offender's compliance with his/her supervision release agreement.
- C. Polygraph examinations in the institution allow the SOMP Team an opportunity to establish risk management and treatment objectives.
 - 1. When an offender is assessed as low-risk on specified test protocols, the offender will complete a polygraph to verify his perpetration history and assess the offender's need for continued treatment.
 - 2. Sexual History Polygraphs can be used as a part of STOP upon review and approval of the SOMP Team.
- D. A polygraph examiner is a person who provides sex offender-specific polygraph exams to sex offenders.
- E. All polygraph examinations conducted on DOC offenders will be reported to the SOMP Team and recorded on the STOP folder located on the M: Drive.
 - 1. Standardized Treatment Responses for Community Supervision:
 - a. The treatment provider should use standardized polygraph treatment responses.
 - b. All monitor polygraph exam results indicating deceptions, inconclusive results, and/or new admissions require a policy driven response.
 - c. For offenders on community supervision to be eligible to have approved contact with children under the age of 18 the offender will need to:
 - 1) Have completed their sexual history polygraph to assess their risk to children,

- 2) Must obtain prior approval from their parole agent and treatment provider for planned contact with children under the age of 18 years,
- 3) The parole agent, treatment provider, and/or SOMP Team may place any restrictions on contact that is deemed necessary for the safety of the children and
- 4) The SOMP Team must staff any request for exceptions.

VI Revision Log:

August 2008: New policy.

August 2009: Policy was under review in conjunction with Parole OMs, but no revisions finalized.

September 2010: **Revised** formatting of Section I. **Added** titles to referenced policies.

January 2012: **Added** definition of LSI-R and P-Scan. **Deleted** "Offenders with a LSI-R score greater than 40 will be referred for a Psychopathic Scan" and **Replaced** with "An offender with a LSI-R score of High Risk/Needs (Females =>40 Males =>37) will have a P-Scan completed after 90 days of observation by unit staff assigned to the inmate" in Section 2 A. 3. c. **Added** "Male" and **Deleted** "of greater than 40) and **Replaced** with => 37 and female offenders with a LSI-R score => 40" in Section 2 A. 3. d.

January 2013: **Added** "COMS Offender Assessment Questionnaire" to Section 1 B. 2. **Deleted** "conduct a clinical interview and will prepare an A&O psychosexual screening report" and **Replaced** with "SOMP Track Screen report" in Section 1 B. 4. **Deleted** 5. "A&O psychosexual screening report will be reviewed with the clinical supervisor prior to being presented at the weekly SOMP staff meeting" in Section 1 B. **Deleted** a. "Once approved, the clinical supervisor and the program director will sign the admission summary report" in Section 1 B. 5. **Deleted** "A&O psychosexual screening report" and **Replaced** with "SOMP Program Track Screen report" in Section 1 C. **Deleted** "2N" and **Replaced** with "2YNA" in Section 1 D. **Deleted** "RRASOR Score" and **Added** "low to moderate low" to the STATIC99 Score in Section 2 A. 1 a. **Deleted** "Monitor polygraph" and **Replaced** with "Modified history polygraph" in Section 2. A. 1. **Deleted** "are identified as having a low risk or violating parole for sexual behaviors or committing a new felony sex offense" and **Replaced** with "will be polygraphed every six (6) months to monitor their low risk status. Offenders who fail a polygraph may be required to attend community based sex offender treatment" in Section 2 A. 1. c. **Deleted** g. "These offenders are identified as having a high risk of violating parole of being convicted of a new felony offense of any kind" in Section 1 A. 1. g. **Deleted** "low" and **Replaced** with "moderate low" in Section 2 A. 2 2.a. 1. **Deleted** "The SOMP Team will reassess" and **Added** "will have a prerelease psychosexual evaluation completed" and **Added** "initial" to Section 2 B. **Deleted** 1. "Offenders identified as needing sex offender programming will be reviewed by the SOMP Team prior to placement in STOP programming" in Section 2 B. **Added** "assessed as needing STOP programming" and **Deleted** "review and" and **Deleted** "prior to beginning the STOP programming" and **Replaced** with "prior to a transfer from an admission unit and prior to beginning the STOP program" in Section 2 C. **Deleted** "The SOMP Clinical Director may supervise and review the completion of" and **Replaced** with "A pre-release" and **Deleted** "as part of the admissions assessment or prior to" and **Replaced** with "will be completed prior to an offender's" and **Added** "Offenders who have refused STOP programming will be required to complete a psychosexual evaluation while under community supervision" in Section 2 E. 2. **Deleted** "supervision" and **Replaced** with "treatment" in Section 2 B. 1. a. **Deleted** "supervision" and **Replaced** with "treatment" and **Deleted** "location, restrictions" and "GPS program" in Section 2 F. 1 b. **Deleted** "may include the following" and **Replaced** with "The following information will be considered when determining" in Section 3 A. **Deleted** "according to the DOC Sex Offender Polygraph Exam Standards" in Section 3 D. **Deleted** "for funding

authorized and tracking purposes" and **Replaced** with "and recorded on the STOP folder located on the M Drive" in Section 3 D. **Deleted** 1. "All polygraphs for DOC offenders need to be pre-authorized by the SOMP team to access DOC funding" and **Deleted** 2. "All completed polygraphs and results will be reported to the SOMP team by the polygraph provided and/or supervising agent for data collection and tracking" and **Deleted** 3. "The SOMP staff will provide the polygraph tracking list to parole agents. Supervising agents will direct parolees to set appointments with specified polygraph examiners" all in Section 3 E. **Renumbered** previous 4. to 1. in Section 3 E. **Deleted** "upon the SOMP Polygraph Exam-Sanctions Standards" in Section 3 E. 1. b. **Deleted** Attachment 1 "SOMP Mainframe Codes". **Deleted** Attachment 2 "A&O Psychosexual Screen and Report" and **Replaced** with "SOMP Program Track Screen". **Deleted** Attachment 7 "SOMP Polygraph Exam-Sanctions Standards"

South Dakota Department of Corrections Policy Distribution: Public		Attachment: STOP Contract Please refer to DOC policy 1.4.A.3 Sex Offender Management Program	
STOP CONTRACT			
I, <input type="text"/> , hereby enter into a contract with the South Dakota Department of Corrections Sex Offender Management Program (SOMP). I understand and agree to the following conditions regarding my treatment.			
1.	I agree to be completely honest and assume full responsibility for my offense(s) and my behavior.		
2.	I will attend all sessions in a timely manner and will notify SOMP staff of any situation that may affect my attendance.		
3.	I understand that three or more unexcused absences may be grounds for termination.		
4.	I understand that refusal to participate during group sessions is not acceptable.		
5.	I will complete sex offender assessments as directed by SOMP staff and answer each item honestly.		
6.	I will not disclose any information regarding another group member. To do so may be grounds for termination.		
7.	I will not become verbally or physically threatening or assaultive with SOMP staff or other group members.		
8.	I understand that a major disciplinary report is considered a serious matter and may result in termination.		
9.	I will not have pictures of my victim(s).		
10.	I will not have any contact with my victim(s).		
11.	I will report to group members any contact with children under the age of (18) or my victim(s).		
12.	I will not use, view, purchase, or have in my possession any form of pornography or erotica.		
13.	I will not have drawings or pictures of minor children under the age of (16) if I have a documented history of victims under the age of (16).		
14.	I understand that failure to comply with any portion of this contract can be grounds for termination.		
15.	I consent to have the SOMP staff release information regarding my progress and behavior to the Parole Board, Department of Corrections staff and community treatment providers.		
16.	In addition, I agree to the following special conditions:		
1.	<input type="text"/>		
2.	<input type="text"/>

Attachment 4: STOP Modules

The **STOP Modules** form is located on the state's WAN.

A copy may be printed using **Microsoft Word** as follows:

1. Click [here](#) to access the **STOP Modules** by:
 - a. Placing mouse on the word "here" above
 - b. Press and hold the "Ctrl" key on the keyboard
 - c. Click the left button of mouse.
2. Or Select **File/New** from the Menu Bar / Select the **DOC** tab / Select **STOP Modules**.

The gray areas indicate the information that is to be entered.

South Dakota Department of Corrections Policy Distribution: Public	Attachment: STOP Modules Please refer to DOC policy 1.4.A.3 Sex Offender Management Program
<h3>STOP MODULES</h3> <p>STOP Program Modules are designed to prepare sex offenders for entry into the community based treatment groups.</p> <ol style="list-style-type: none">a. Family History: The purpose of this assignment is to introduce the offender and develop trust with the group. The genogram worksheet is used to help the offender discuss their family history as it relates to their psychosexual development and sexual perpetration. The offender is asked to describe family dynamics and to detail any history of sexual and/or emotional abuse.b. Sexual Terminology: The purpose of this assignment is to give the offenders a common language to discuss and process their sexual perpetration with the group. In this assignment the offender is asked to define, recite and demonstrate their understanding of each sexual term. (25 total).c. Sexual Anatomy and Diagramming: The purpose of this assignment is to give each offender a basic understanding of male and female sexual anatomy and functioning. Research and clinical experience demonstrate that sex offenders lack knowledge and understanding in this area. The offender is asked to identify and describe general sexual anatomy for both males and females to help increase their competency in this area.d. Disclosure Assignment (History of Pornography): The purpose of this assignment is to have the offender disclose his use and exposure to pornography and general erotica. Research and clinical experience shows that pornography often makes the onset of cognitive distortions and negative attitudes towards women and children. The offender is asked to document his use of pornographic magazines, films, videotapes, pictures and internet imagery of both men and women and present this to the group.e. Disclosure Assignment (History of Observed Sexual Behaviors): The purpose of this assignment is to have the offender disclose how they learned about sex from watching others. This assignment is important in helping the offender understand how early sexual experiences have affected their general sexual development. The offender is asked to document his history of observed sexual behaviors and present this to the group.f. Disclosure Assignment (History of Masturbation): The purpose of this assignment is to help the offender understand how his masturbation behaviors and fantasies are often correlated with distant sexual behaviors. The offender is asked to describe how he learned to masturbate, frequency of masturbation and so forth. This assignment also requires the offender to describe and present to the group their consensual sexual experiences, involvement with any paraphilia and any additional sexual acts other than sexual perpetration.g. Disclosure Assignment (History of Sexual Perpetration): The purpose of this assignment is to have the offender describe to the group in detail their entire history of sexual perpetration. This includes their instant offense as well as any other acts of sexual perpetration, which includes fantasies about their victim(s).h. Disclosure Assignment (Sexual History Polygraph Booklet): The purpose of this assignment is to have the offender complete their actual sexual history polygraph booklet and present it to the group. The completed booklet will be used for their sexual history polygraph when they are released to the community.

South Dakota Department of Corrections Policy Distribution: Public		Attachment: SOMP Treatment Providers Standards Please refer to DOC policy 1.4.A.3 Sex Offender Management Program	
SOMP TREATMENT PROVIDERS STANDARDS			
Treatment Provider: A "Treatment Provider" means a person who provides sex offense-specific treatment to sex offenders according to the following standards of practice.			
1.	Provider will agree to carry current licensure in their respective field (examples of, but not limited to the following: Licensed Practical Counselor, Licensed Psychologist, Licensed Clinical Social Worker or be under clinical supervision and pursuing licensure).		
2.	Provider agrees to have offenders sign and adhere to a sex offender treatment contract.		
3.	Provider agrees to maintain weekly progress notes.		
4.	Provider agrees to maintain accurate financial records of an offender's payments for services.		
5.	Provider agrees to maintain documentation of assessments and release of information forms.		
6.	Provider agrees to allow a representative of the State to have access to the offender's file.		
7.	Provider will incorporate polygraph examinations to ensure compliance with treatment expectations.		
8.	Provider will currently be a member of ATSA (Association for the Treatment of Sexual Abusers) or be working towards membership, or must follow the "ethical guidelines" of ATSA.		
9.	Provider will maintain a cooperative working arrangement with the offender's community supervision agent.		
10.	Provider will offer sex offender treatment services based on the level of risk as directed under the sex offender typology.		
11.	Provider will document and notify the community supervision agent when the offender has an unexcused absence from group.		
12.	Provider treatment groups will be of the same gender.
